Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 10 and 11 are rejected under 35 U.S.C. 102(b) as being anticipated by Stukas (719).

Stukas teaches a shackle lock including a housing 106 in fig. 8, a locking member 82, 32, 34, 36 in the housing, a shackle cable 76 having a first connecting member 74 at a first end which is smaller than a second connecting member (reel 72) at the second end of the shackle, a first shackle hole (where element 74 is located in fig. 1), and a second shackle hole 30 in fig. 8 "corresponding to" the second connecting member and which has a greater diameter than the first shackle hole, the diameter of the second shackle hole 30 is greater than the diameter of the first connecting member 74 and smaller than the diameter of the second connecting member (reel), the first connecting member 74 is allowed to pass through the second shackle hole 30, the second connecting member (reel) is not allowed to pass through the second shackle hole 30, the first connecting member 74 is locked by the operation of the locking member 32, 34, 36.

Claims 1, 10 and 11 are rejected under 35 U.S.C. 102(b) as being anticipated by Monaco (582).

Monaco teaches a shackle lock including a housing 14, a locking member 12 in the housing, a shackle cable having a first connecting member (the free end of cable 80 as

seen in fig. 9) at a first end which is smaller than a second connecting member 82 at the second end of the shackle cable, a first shackle hole (rightmost occurrence of 34 in fig. 10), and a second shackle hole (leftmost occurrence of 34 in fig. 10) corresponding to the second connecting member and which has a greater diameter (top to bottom length) than the first shackle hole, the diameter of the second shackle hole is greater than the diameter of the first connecting member and smaller than the diameter of the second connecting member (including the unlabeled connector directly above end 82 in fig. 9 which connects the portions of the cable end 82 and forms the loop 82), the first connecting member is allowed to pass through the second shackle hole, the second connecting member is not allowed to pass through the second shackle hole, the first connecting member is locked by operation of the locking member 12 when member 12 is in its figure 16 position and locked by padlock 40.

Applicant's arguments with respect to claims 1, 10 and 11 have been considered but are moot in view of the new ground(s) of rejection.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the

Art Unit: 3676

shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
